

# New Mexico National Guard

## Oñate Complex Update

**The Adjutant General, Andrew E. Salas**  
**The Assistant Adjutant General, Juan L. Griego**

**October 22, 2014**

# Opportunity

---

- New Mexico requires a long term solution for emergency response that provides added value to multiple State and Local agency requirements
- The land purchase of 262 acres South of the existing Oñate Military Complex will support preservation of existing capabilities and enable future expansion

# Benefits

---

- Operated by the Department of Military Affairs
- Supports state emergency/disaster response and homeland defense activities
- Supports multiple departments and agencies
- Enables expansion of operational areas and supports inter-agency cooperation and training

# Potential Partnerships

# Steps Taken to Date

---

- Appraisal conducted in 2008 (\$2.4M)
- Fully Supported information gathering meeting conducted on July 9, 2013;
  - New Mexico National Guard, Departments of Public Safety, Corrections, General Services Division, Santa Fe Public Schools and New Mexico State Police
- Capital Outlay request to purchase Montoya tracts through GSD submitted in 2016 ICIP submittal

# Land Partnership Proposal

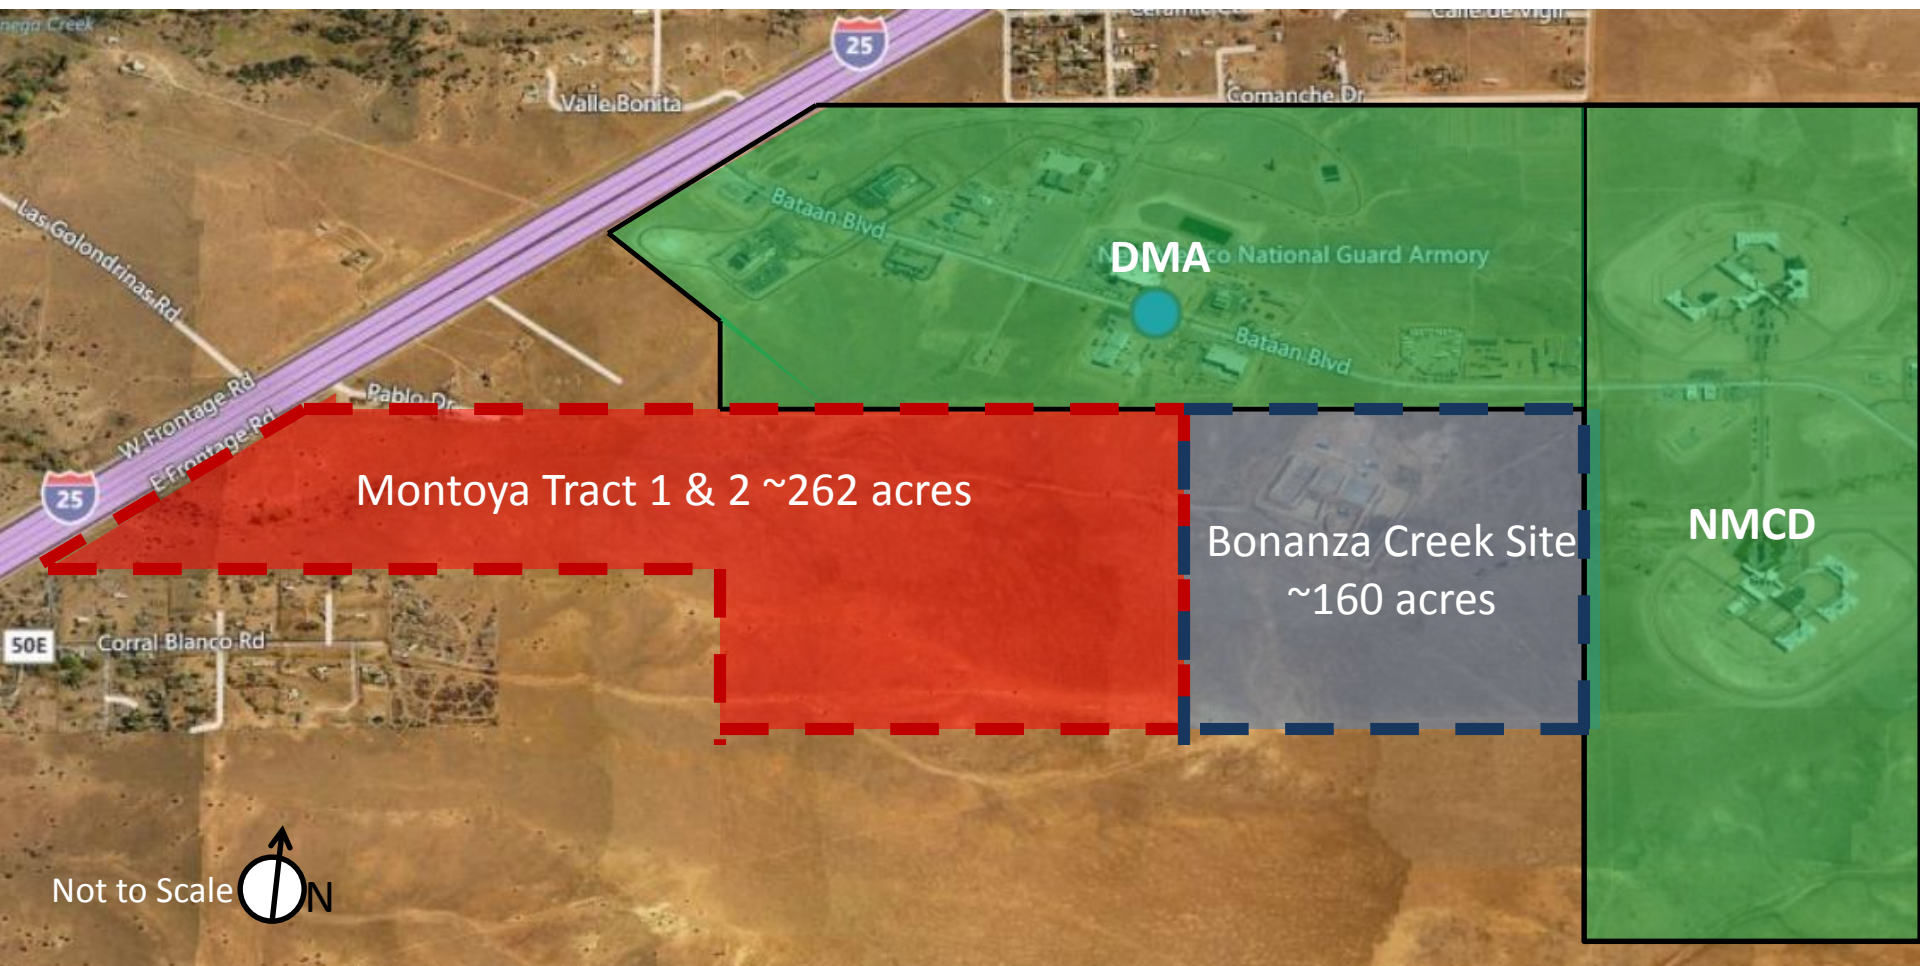

---

- DPS to purchase Bonanza Creek Site, ~160 acres
- On behalf of DMA, GSD to purchase Montoya tracts 1 & 2, ~262 acres
- Department of Military Affairs to take lead in supporting the site

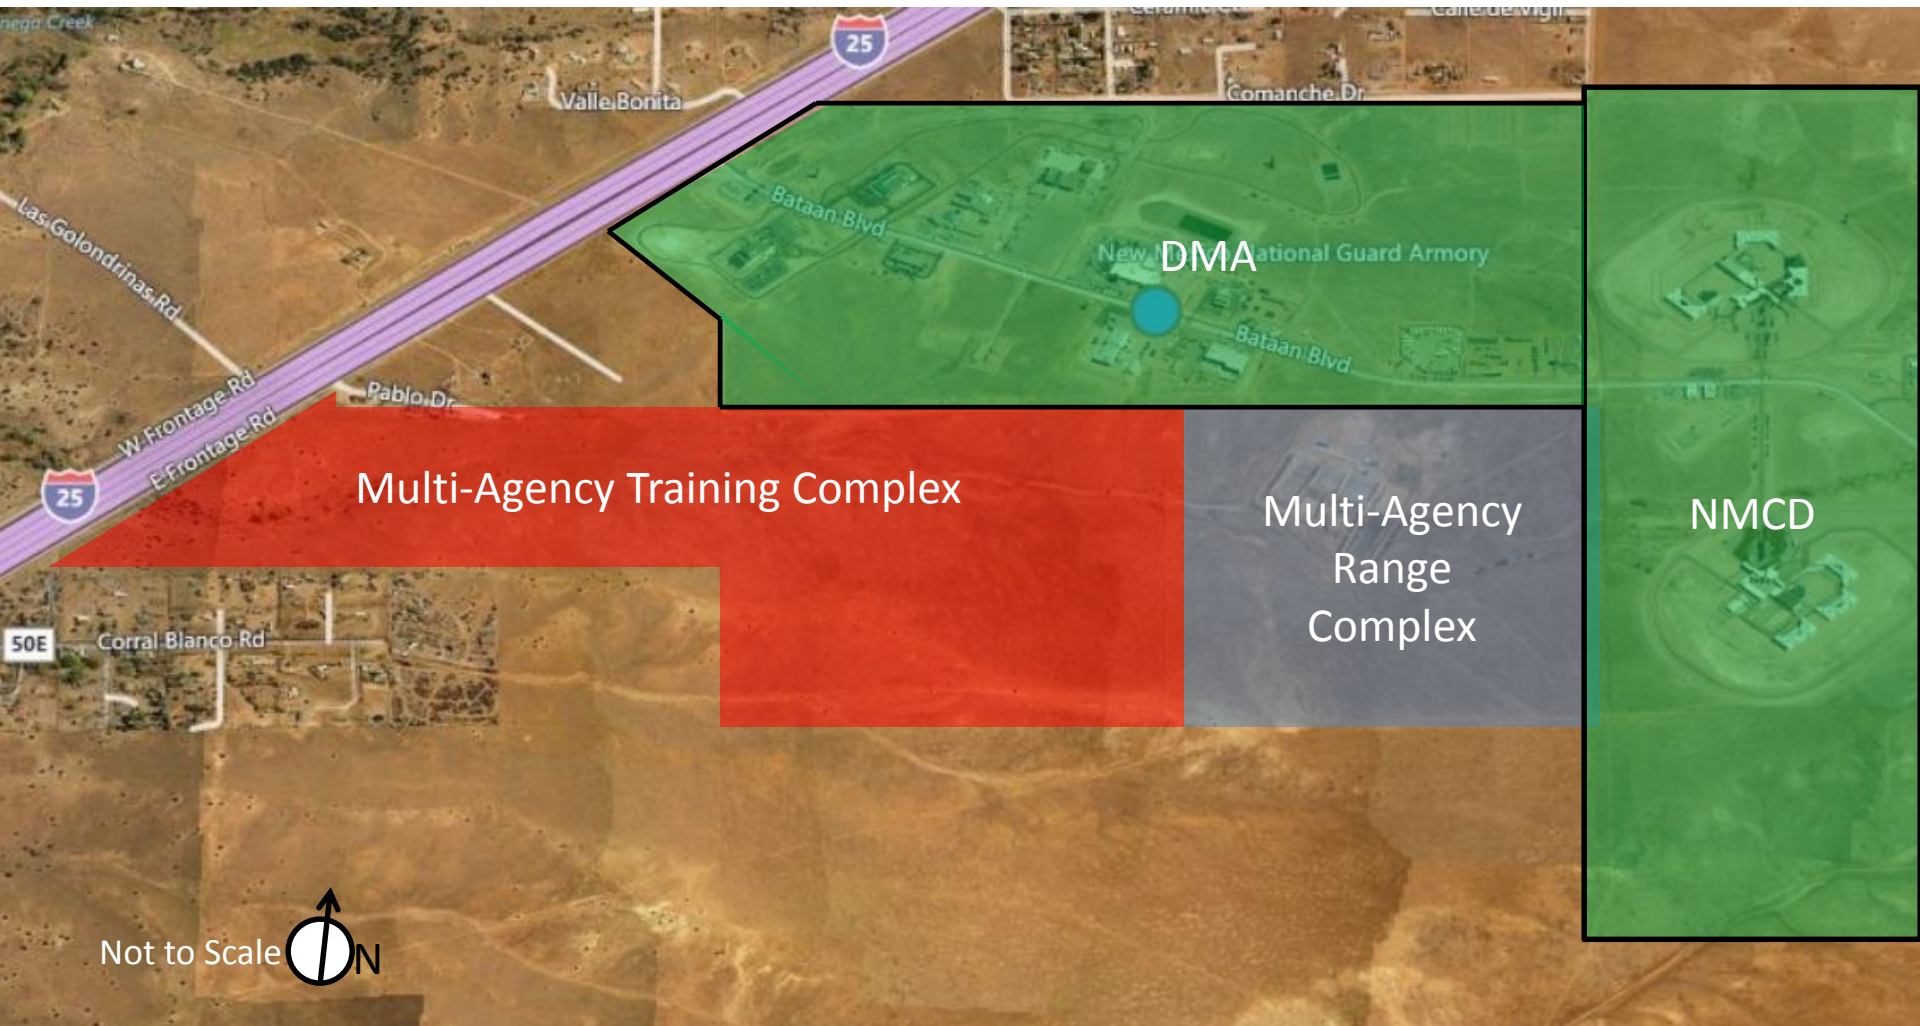

# Map of Acquisition

- Department of Military Affairs (DMA)
- Department of Public Safety (DPS)

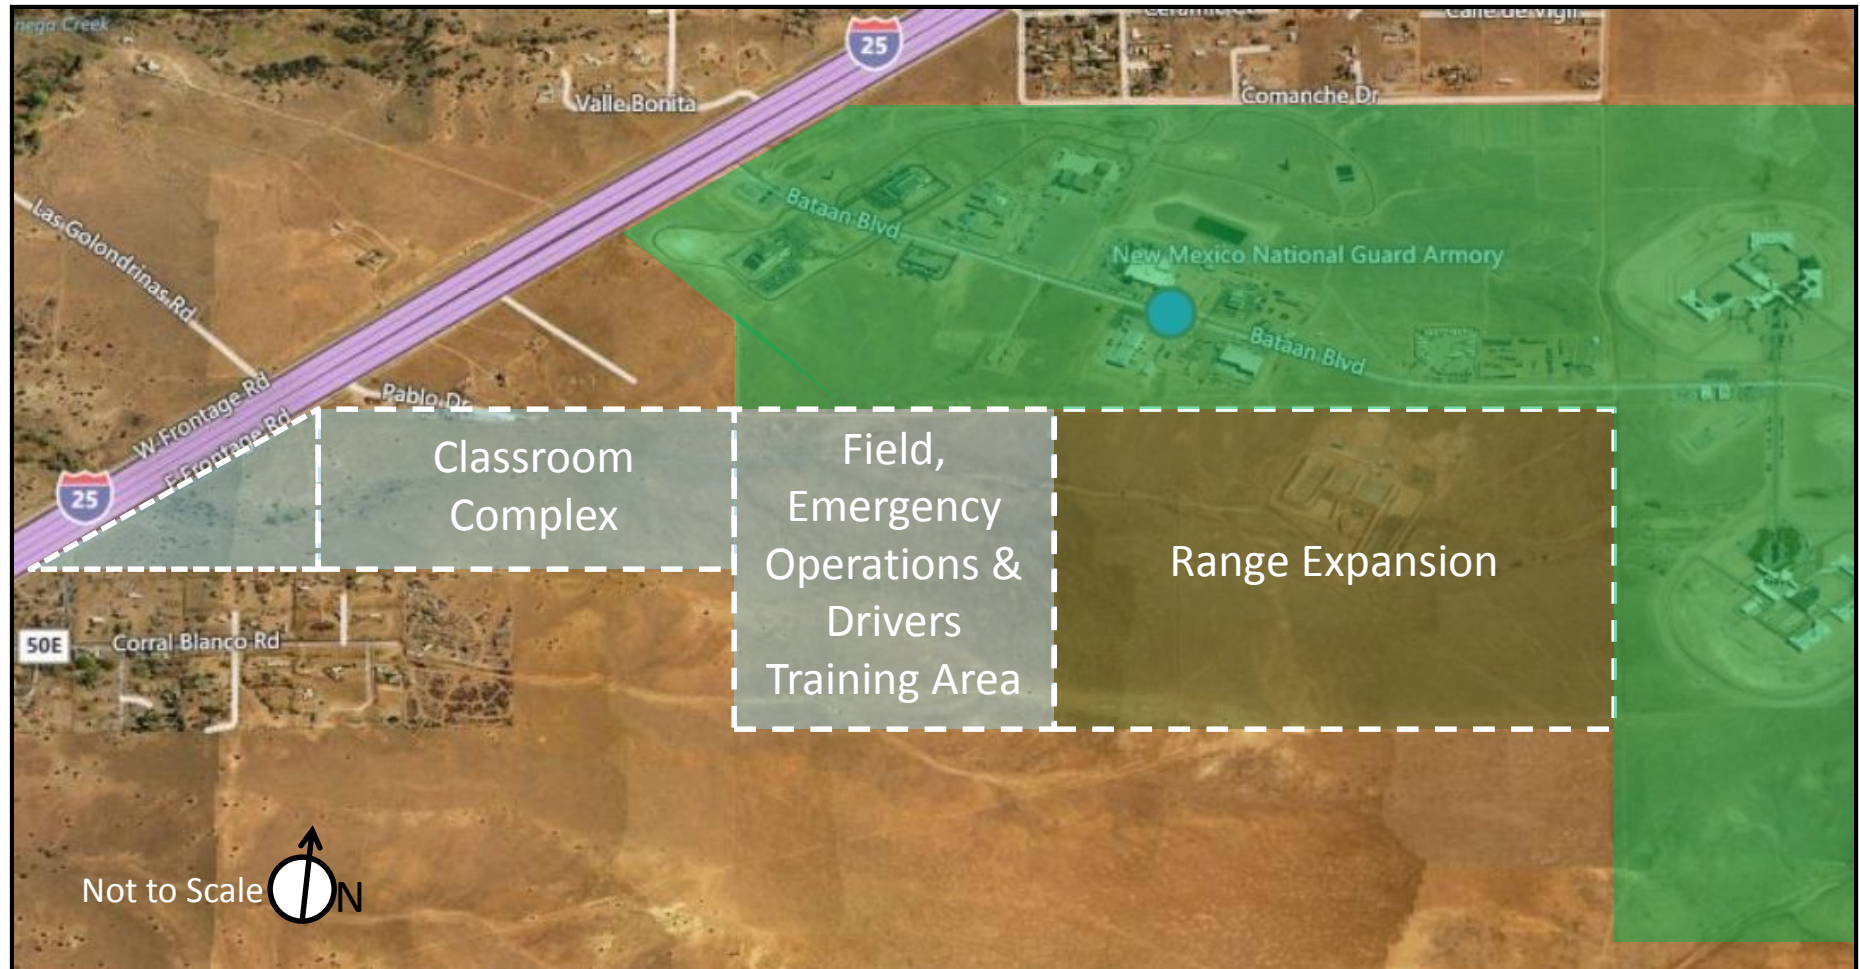

# Map of Potential Use

# Map of Opportunities

# Risks

---

- Acquisition cost will continue to increase
- Inability to pursue of Inter-agency facility
- Limited training area space
- Limited expansion opportunities
- Training activities exposed to public
- Limits ability maintain buffer for local community (encroachment)

# Next Steps

---

- Develop an Oñate Site inter-agency working group/task force
- Conduct a thorough survey of agency requirements/facility deficiencies
- Develop a site master plan
- Identify potential funding streams
